

FIREPLACE CLEANING

OPEN FIREPLACES.

We clean the fire box, damper, smoke ledge & chimney.

FIREPLACES WITH A WOOD BURNING INSERT.

We clean the wood stove, fire box, damper, smoke ledge & chimney. Normally the wood burning insert will need to be pulled, if it is not directly piped in to the fireplace flue.

Drop cloths are used to protect the rugs and flooring. The vacuum hose is inserted in the fire box and a cover is placed over the front of the fireplace, to prevent any soot or ash from escaping into the living area.
